

CONTROLO 2024 Articles

Track	Order in track	Paper #	Authors	Title
Reg1	1	8	Higor Rosse, Joao Coelho and José Barbosa	<i>Pedestrian Safety Crosswalks in Smart Cities: the VallPass Approach</i>
Reg1	2	23	Sara Fakh, Laetitia Perez and Laurent Autrique	<i>Identification of control law and trajectory for mobile disturbance rejection in a 2D thermal context</i>
Reg1	3	31	Blaz Zakej and Primoz Podrzaj	<i>Implementation of a water level control system using programmable logic controller with remote access</i>
Reg1	4	52	Ahmad Safaee, Antonio Pedro Aguiar, Filipe Neves Santos and Antonio Paulo Moreira	<i>Design and Development of a Fixed-Wing Tail-Sitter Tethered VTOL Drone with Custom Autopilot and Robust Control Techniques</i>
Reg2	1	43	Theodor-Gabriel Nicu, Florin Stoican, Daniel-Mihail Ioan and Ionela Prodan	<i>Design of a Navigation Function for a Polyhedral World</i>
Reg2	2	62	Diogo Remoaldo, Isabel S. Jesus and Ramiro S. Barbosa	<i>Improved Fuzzy Incremental Conductance MPPT Algorithm for a Photovoltaic System</i>
Reg2	3	80	Andreas Bück and Stefan Palis	<i>Modelling and Efficiency Enhancement of Tablet Coating in a Rotary Drum</i>
Reg2	4	66	Francisco R. Rubio, Sergio Vazquez, Fernando Castaño, Juan Manuel Carrasco and Manuel G. Ortega	<i>Gain Scheduling PI Voltage Control of Three-phase AC/DC Power Converters</i>
Reg3	1	9	Rodrigo Salles, Joana Leiria and Jerome Mendes	<i>Data entry errors detection for industrial quality control variables using data-driven models</i>
Reg3	2	36	Jakob Winkler, Christian Uhl, Stefan Geißelsöder, Tim Erdbrugger and Carsten Wolters	<i>Comparison of classical EEG source analysis with deep learning</i>
Reg3	3	39	G. Reza Nazmara, Pedro Neto and A. Pedro Aguiar	<i>Robust Learning-based Impedance Control of Robotic Manipulators in Unknown Environments</i>
Reg3	4	86	Luis Brito Palma	<i>Adaptive Data-Based PID-PCA Controller for SISO Systems</i>
Reg4	1	37	Jorge Diogo Ribeiro, Héber Miguel Sobreira and António Paulo Moreira	<i>A Nonlinear Model Predictive Control Strategy for Trajectory Tracking of Omnidirectional Robots</i>
Reg4	2	53	Yassine Boukili and A. Pedro Aguiar	<i>LQR Based Control Strategies for DFIG-Based Wind Energy System</i>
Reg4	3	79	Elham Yazdani Bejarbaneh, Haiping Du and Fazel Naghdy	<i>Optimal Cooperative Intersection Control of Heterogenous Vehicle Platoons with MiTraS</i>
Reg4	4	82	Nahid Binandeh Dehaghani, A. Pedro Aguiar and Rafal Wisniewski	<i>Application of CRAB Algorithm for Enhanced Entanglement Synthesis</i>
Reg5	1	65	Pallov Anand, A. Pedro Aguiar and B. B. Sharma	<i>Finite-time Stabilization of a Class of Nonlinear Systems with Parametric Uncertainty using Backstepping Approach: Application to Chaotic Systems</i>
Reg5	2	44	Tahar Bensouici and Imen Assadi	<i>Fractional At-Alaoui Analog-to-digital Transform</i>
Reg5	3	50	Imen Assadi and Tahar Bensouici	<i>Premature Labor Detection based on fractional order system modeling</i>
Reg5	4	5	Guilherme Ramos and Sérgio Pequito	<i>Distributed Computation of Source, Target, and Mixed Strongly Connected Components in Multi-Agent Systems</i>
Reg6	1	22	Hugo Alonso, Teresa Mendonça and Paula Rocha	<i>A parameter estimation process for improved drug infusion</i>
Reg6	2	42	Ivan Francisco Yupanqui Tello and Renzo Martin Mendoza Rabanal	<i>POD based observer design of multivariable PDE systems</i>
Reg6	3	64	Estevo Gedraite, Vinicius Pimenta, Rafael Barbosa, Alex Waldmann, Rubens Gedraite and Claudio Garcia	<i>System Identification applied to a Shale Shaker using Linear and Non-Linear Models</i>
Reg6	4	85	Luis Miguel Teixeira, Paulo Alexandre Cardoso Salgado, Paulo Lopes dos Santos and Teresa P Perdicoulis	<i>Meteorological variables forecast using Dynamic Mode Decomposition (DMD)</i>
SS1	1	6	Velimir Jurdjevic	<i>HAMILTONIAN VIEW OF FINITE DIMENSIONAL QUANTUM MECHANICS</i>
SS1	2	73	Krzysztof Krakowski	<i>On a Certain Representation of Stiefel Manifolds</i>
SS1	3	19	Niklas Rauchenberger and Knut Hüper	<i>Endpoint Geodesic Formulas for the Special Euclidean Group</i>
SS1	4	18	Daisuke Tarama	<i>Geodesic flow for the statistical transformation model of multivariate normal distributions</i>
SS1	5	25	Markus Schlarb	<i>A family of Metrics and Quasi-Geodesics on the Manifold of Essential Matrices</i>
SS1	6	71	Luis Machado, Margarida Camarinha and Fátima Silva Leite	<i>Swelling effect along Riemannian polynomials on SPD manifolds</i>
SS1	7	40	Martina Flammer	<i>An application of spatiotemporal persistence landscapes and dimension reduction techniques to EEG data</i>
SS1	8	35	Annika Stiehl, Nicolas Weeger and Christian Uhl	<i>Comparison of mode selection and reconstructions obtained by DyCA and DMD with respect to noise robustness and sampling</i>
SS1	9	14	Alexandre Anahory Simoes, Leonardo Colombo and Fatima Silva Leite	<i>Comparison of two numerical methods for Riemannian cubic polynomials on Stiefel manifolds</i>
SS2	1	13	Oussama Hadj Abdelkader and Hadjer Bouzebiba	<i>A Double Layer Control Method for Sustainable Agricultural Production Management in a Competitive Market</i>
SS2	2	55	Pedro Caio and Cristiana J. Silva	<i>Application of indirect methods to optimal control problems in epidemiology</i>
SS2	3	77	Huu Thien Nguyen, Manuel C. R. M. Fernandes, Ionela Prodan and Fernando A. C. C. Fontes	<i>Trajectory Optimization for a Four In-wheel Motor Vehicle in Double Lane Change Maneuver</i>
SS2	4	27	Ana P. Lemos-Paião, Sofia O. Lopes and M. D. R. de Pinho	<i>Sensitivity analysis for optimal control: application to an irrigation problem</i>
SS3	1	84	Rui da Costa, Manuel C.R.M. Fernandes, Luis A.C. Roque and Luis Tiago Paiva	<i>Improving Power Smoothing of Airborne Wind Energy Farms by Sizing an Energy Storage System</i>
SS3	2	58	Sergio Vinha, Gabriel M. Fernandes and Fernando A.C.C. Fontes	<i>Circular take-off and landing of tethered aircrafts with variable tether length</i>
SS3	3	60	Gabriel M. Fernandes, Conrado Guimarães Costa, Sérgio Vinha and Fernando A.C.C. Fontes	<i>A testing platform for Airborne Wind Energy: modelling, sensing, and actuation</i>
SS3	4	83	Luis Tiago Paiva, Alzira Mota and Luis A.C. Roque	<i>Optimisation and Control in Airborne Wind Energy: A Bibliometric Study</i>

SS4	1	38	Diogo Gomes	<i>Emerging Research Directions in Mean Field Games</i>
SS4	2	33	Manuela Bujorianu and Rafael Wisniewski	<i>Abstraction based safety for Markov decision processes</i>
SS4	3	21	Roman Chertovskih, Nikolay Pogodaev, Maxim Staritsyn and A. Pedro Aguiar	<i>On Minimum-Dispersion Control of Nonlinear Diffusion Processes</i>
SS4	4	7	Dmitry Karamzin	<i>Necessary Optimality Conditions for a Weak Minimum in Control Problems with Non-regular Mixed Constraints</i>
SS5	1	17	Abdelkader Belhenniche and Roman Chertovskih	<i>Fixed Point Theory Analysis of a Lambda Policy Iteration with Randomization for the Ciric Contraction Operator</i>
SS5	2	1	Filipe Martins, Diogo Pinheiro and Alberto Pinto	<i>An overview of duality theory techniques for the computation of optimal life insurance purchase, consumption and investment</i>
SS5	3	10	Sergo Tsiramaia, Sul Khan Sul Khanishvili and Lazare Kvirtia	<i>Optimal Management of Systems Based on Multifunctional Elements</i>
SS5	4	63	Gil Miguel Marques and Sílvia Gama	<i>Energy optimal control in Lamb-Oseen vortex flow</i>
SS5	5	15	Maria do Rosario de Pinho	<i>A Note on the Minimal Time of Crisis Problem: a Multiprocess Approach</i>
SS5	6	41	Carlos Balsa, Sílvia Gama and Victoria Otero-Espinar	<i>Particle movement on a rotating sphere</i>
SS5	7	59	Harry Zheng and Ashley Davey	<i>Deep Neural Network Solver for HJB Equations</i>
SS5	8	81	Francisco Almeida, Roman Chertovskih, Sílvia Gama and Rui Gonçalves	<i>What makes a steady flow to favour kinematic magnetic field generation: A statistical analysis</i>
SS6	1	26	Payam Aboutalebi, Fares M'Zoughi, Irfan Ahmad, Tahereh Bagheri Rouch, Izaskun Garrido and Aitor J. Garrido	<i>Synergistic Offshore Energy Harvesting: Advancements in Hybrid Semisubmersible Floating Wind Turbines with Oscillating Water Columns</i>
SS6	2	46	Fares M'Zoughi, Payam Aboutalebi, Irfan Ahmad, Tahereh Bagheri Rouch, Izaskun Garrido, Aitor J. Garrido and Manuel De La Sen	<i>Vibration Mitigation of Hybrid Oscillating Water Column-Floating Offshore Wind Turbine using ANFIS-based Airtow Control</i>
SS6	3	69	Mario Peñacoba, Jesus Enrique Sierra Garcia and Matilde Santos	<i>Enhancing Robotic Control Efficiency with MLP-Based Inverse Kinematics: first approach</i>
SS6	4	74	Alberto Martinez, Matilde Santos and J. Enrique Sierra-Garcia	<i>PIL environment to validate wind turbine IEC61131-based real time controllers on digital twins</i>
SS7	1	29	Mohammad Reza Ranjbar Divkoti and A. Pedro Aguiar	<i>A Hybrid Learning-Based Path Planning Algorithm for Enhanced Safety in Autonomous Robots</i>
SS7	2	48	Rafael Carbonell, Ángel Cuenca, Julián Salt and Vicente Casanova	<i>Efficient Wireless Networked Control for Holonomic Mecanum-Wheeled Robot Path Tracking</i>
SS7	3	51	Andrea Tiranti, Francesco Wanderlingh, Antonio Pascoal, Enrico Simetti and Giovanni Indiveri	<i>Multiple Autonomous Underwater Vehicle Motion Planning for Passive Acoustic Monitoring.</i>
SS7	4	30	Mariano Alvarez, Laiany Suganuma Brancalão, Jorge Carneiro, Paulo Costa, Joao Paulo Coelho and José Gonçalves	<i>Laser engraving for 3D surfaces: A robotized application case study</i>
SS8	1	70	Julia Lieb, Raquel Pinto and Carlos Vela	<i>Decoding of convolutional codes over an erasure channel via an encoder</i>
SS8	2	24	Miguel Sales Cabrera, Xaro Soler-Escrivà and Victor Sotomayor	<i>Construction of some group codes and dihedral quantum codes</i>
SS8	3	61	Verónica Requena, Diego Napp, Joan-Josep Climent and Julia Lieb	<i>A state-space representation for a class of MDP convolutional codes</i>
SS8	4	67	Ettore Fornasini, Diego Napp, Ricardo Pereira, Raquel Pinto and Paula Rocha	<i>Decoding of periodic convolutional codes</i>
SS8	5	68	Diego Napp, Filipa Santana and Raquel Pinto	<i>A construction of an MRD <math>(5 \times 5, 1, 19)</math> rank metric convolutional code</i>
SS8	6	72	Zita Abreu, Raquel Pinto and Rita Simões	<i>Constructions of non-catastrophic MDS convolutional codes of rate 1/2</i>
SS9	1	11	Verónica Requena Arévalo, Sara D. Cardell and Joan-Josep Climent	<i>On Binary Linear Codes and Sequences</i>
SS9	2	32	Paulo Almeida, Miguel Beltrá Vidal and Diego Napp	<i>A Convolutional Variant of the Niederreiter Cryptosystem with GRS Codes</i>
SS9	3	45	Joachim Rosenthal, Niklas Gassner, Abhinaba Mazumder and Abigail Sutton	<i>Using Linear Systems for building a Public Key System</i>
SS9	4	57	Zita Abreu, Raquel Pinto and Rita Simões	<i>MDS Multidimensional Convolutional Codes</i>
SS10	1	54	João Pedro Caldas Ferreira, João Pedro Chaves D'el Rei Costa, Paulo Lopes Dos Santos and Teresa Azevedo Perdicoulis	<i>Discharge Behavior of Lithium Batteries</i>
SS10	2	47	Cong Khanh Dinh, Ionela Prodan and Florin Stoican	<i>Multi-agent collision avoidance based on buffered Voronoi cells and B-splines</i>
SS10	3	75	Nerval de J. S. Junior, Hellen Dianne Pereira de Souza, Shigeaki Leite de Lima and Denivaldo Lopes	<i>Low-cost architecture for identifying voltage and current harmonic frequencies Using FFT</i>
SS10	4	76	Wentson Carlos F. Leite, Nerval de J. S. Junior and Pedro Baptista Fernandes	<i>Methodology of Drone Control with Integration of Optimal Fuzzy System</i>
SS11	1	56	Paolo Vettori	<i>Trajectories of Linear Behaviors over Quaternions</i>
SS11	2	49	Isabel Brás	<i>An nD Behavioral Journey</i>
SS11	3	20	Margreta Kuijper	<i>Linear System Detection and Correction of Adversarial Attacks</i>
SS11	4	12	Jose Aleixo	<i>Minimal state-space realization of periodic input/output behaviors</i>
